

--	--

students ,hobbyist and makers.

What Makes It Different ?

Disciplines Covered

IoT (Internet of Things).

Robotics

Smart Agriculture

Home Automation

Machine Learning

Student's Gain

Logic and Aptitude development.

Programming fundamentals development.

Reasoning and Problem Solving.

Theoretical and practical knowledge of microcontrollers.

Theoretical and practical knowledge of Analog and Digital Sensors.

Sensor network

IoT Ecosystem.

Protocols Mqtt,CoAP,6LowPan.

Edge and Cloud computing

Features

- Temperature, Humidity and Pressure Sensor
- Light Intensity Sensor
- Distance Sensor
- Dual Motor driver
- Digital I/O
- Analog Inputs
- OLED Screen Interface.
- Two Programmable Switches
- Six Addressable LEDs WS2812
- Isolated Relay
- One Dedicated Servo Port
- Buzzer
- Touch Pad
- Hall Sensor
- BLE
- WiFi

Courseware

- Step by Step
- Comprehensive
- Hands On
- Real Life Scenario
